Visual Media Design

Kyle Mah

Raster Project.

For the raster project I combined multiple elements using Adobe Photoshop to create an interesting collage. I drew inspiration from some of my favorite movies, The Avengers, and decided to add my own twist on it.

Vector Project.

ABOUT

I used Adobe Illustrator to contruct a vector drawing of Iron Man, which I implemented into my raster project as it fit the theme. As you can see, I am constructing a sort of movie poster with each subsequent project adding a little more content.

(No Copyright Infringement Intended). All rights go to Walt Disney Pictures, Alan Silvestri, and Marvel Studios.

Time Based Media Project.

The picture depicted is the title sequence from my animation project. For this project I used Adobe Animate to bring my vision to life. In the project, I animated a short video using elements from my raster and vector projects while also adding other layers of immersion through the use of sound and movement.

ABOUT Me.

My name is Kyle. I was born and raised right here in San Francisco. I am taking VMD to learn skills to pursue my goal of being a UX/UI designer. I am a creative person and I draw a lot of inspiration from movies and anime. I enjoy popular anime such as Dragon Ball and Naruto. In my free time I like to go out to eat at new places and to go on hikes to be around nature.
